

# Principal Scientist – Immuno-Oncology

## (Permanent position)

---

**DOMAIN THERAPEUTICS** is a leading biopharmaceutical company in the field of G Protein-Coupled Receptors (GPCRs), one of the most important classes of drug targets.

We are dedicated to consolidating this position by developing a high-value pipeline of innovative drug candidates.

To achieve this, we will continue to focus on identification of new class of treatments by leveraging our expertise, innovative approach and proprietary technologies as well as our strong company culture.

### WHAT WE OFFER

- A stimulating scientific position within a high-potential innovative biotech company.
- The opportunity to work in a science-driven, dynamic, human-sized, respectful and professional environment.
- A challenging scientific and business growth in which you get to bring your knowledge and skills.
- Varied contacts inside the company, the biotech/pharma sector and the scientific world.

### THE CONTEXT & RESEARCH PROJECT

As a scientist specialized in Immunology, the candidate will join the new Innovation and Immunology Department, which is closely related with the Biology and Chemistry Departments. Domain Therapeutics is actively looking for a highly motivated and creative **Principal Scientist with expertise in immunology, immune-oncology** to take a principal role in supporting the implementation of the novel immuno oncology translational platform.

With a role in the project team(s), the selected candidate will work in close interaction with the Head of Innovation and Immunology Department and the CTO. More specifically, the responsibilities will be to:

- Perform and implement immuno assays development, optimizations, and validations as a primary lead and/or in collaboration with others.
- Coordinate scientific activities, internally and in collaboration with partners.
- Maintain a working knowledge of current experimental techniques and literature in the field of immune-oncology.
- Develop and foster a strong commitment to innovation within the team to maintain a high level of scientific and technical expertise in the domain.
- Analyze, interpret and present experimental results at lab meetings, project meetings and multi-disciplinary research group
- Work well with colleagues in a matrixed, fast-paced pharmaceutical research environment

## WHO YOU ARE

- PhD (or MD/PhD) in immunology/oncoimmunology , with at least 18 months of relevant post-doctoral research experience in immunology, oncology, or cancer immunotherapy. Experience in Pharma, Biotech is a plus.
- Fluent in English (oral and written). French is a plus but not required.
- Strong expertise in Flow cytometry, Sorter and immunology assays. Experience in MSD is a plus.
- Experience in mAbs discovery / Immunophenotyping / Biomarkers characterization.
- Strong team player with good oral and written communication skills and with a demonstrated ability to work independently to design and run experiments, interpret data, troubleshoot, and suggest next steps.
- Organized and rigorous, you have a good ability to adapt to changes in priorities and to work effectively in a fast paced environment (with internal and external stakeholders).
- Ability to supervise trainees and to train colleagues on newly developed assays.

## JOB CHARACTERISTICS

: Permanent position / Full Time

: Salary to be defined + many advantages (Restaurant tickets, Holiday vouchers, Health assurance, ...)

: Position to be filled ASAP

**Domain Therapeutics offers you an opportunity to use your skills in a humane and benevolent work environment ... Tempted? so don't hesitate, join the Domain Therapeutics adventure!**

## NEXT STEP IS YOURS

To apply, please send before October 1st, 2020:

- a Detailed CV including names and contact details of 3 reference persons.
- a "Research experience" document (1-page description of research, training and cytometry activities already undertaken).
- a "Motivation" document.
